

SHADEFIN™

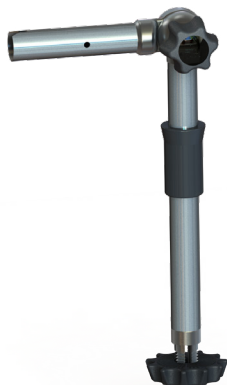

Add an extra layer of sun protection with ShadeFin by TACO Marine – a new product that easily attaches into rod holders, tops and arches for convenient, portable shade for almost any boat.

ShadeFin's ocean-inspired design provides expanded shade coverage for multiple areas of the boat, including fore, aft and sides of tops or anywhere there is a rod holder.

To anticipate the needs of many boaters, ShadeFin pairs with either a Fixed or Adjustable Rod Holder Mount, which insert into any standard T-top rod holder or into a gunnel rod holder with an adapter, a Hardtop Bracket Mount, the Grand Slam 170 Outrigger or 170-2 Center Rigger Mounts, or with a Fixed or Adjustable Clamp-On Mount for pipe or tube. ShadeFin also works with a Telescopic Rod Holder Accessory for extended coverage right from the gunnel. ShadeFin's body houses the ribs and material and is offered in black or white.

To operate ShadeFin, remove the sleeve, mount to a desired location onboard and activate the underside release tabs. Structural ribs attached to weather-resistant sun-protecting fabric expand out from the body to lock the fin in place. ShadeFin is lightweight, portable and requires no drilling.
